

## Save the date of the ICEC2026 - 3<sup>rd</sup> International Conference on Earthen Construction in Lisbon – July 8<sup>th</sup>-10<sup>th</sup> 2026

Dear All,

We are pleased to invite you to the **3rd International Conference on Earthen Construction (ICEC2026)**, which will take place in **Lisbon, Portugal, from July 8<sup>th</sup> to 10<sup>th</sup> 2026**. Held every two years, this conference is the leading event for those related in characterization, optimization, and promotion of earthen building materials, products, and technologies — both for new construction and the preservation of architectural heritage. It brings together world-renowned experts to advance the scientific and technical development of earthen construction.

ICEC 2026 is proudly supported by RILEM ([www.rilem.net](http://www.rilem.net)), ICOMOS-ISCEAH ([isceah.icomos.org](http://isceah.icomos.org)), and PROTERRA ([redprotterra.org](http://redprotterra.org)). Conference proceedings will be published by Springer, with each article assigned a DOI.

Over the course of three days, distinguished keynote speakers — **Philippe Coussot**, **Christof Ziegert** and **Mariana Correia**— will address topics such as microstructural research on earthen composites, the standardization of earthen building products, and the conservation of architectural earthen heritage

In addition, a technical exhibition will feature leading companies showcasing equipment and building products compatible with earthen construction, creating valuable networking opportunities.

For more information about ICEC 2026, please visit our official website [icec2026.sciencesconf.org](http://icec2026.sciencesconf.org) — updates will continue to be posted there.

We look forward to welcoming you to Lisbon in July 2026 for this exciting event!

Best regards,

Paulina Faria

Emmanuel Keita

Ana Brás

Antonin Fabbri

Arnaud Perrot

Celine Perlot

Chris Becket

(Chair of the Organizing Committee and Steering Committee of ICEC2026)
